

24V LOW-VOLTAGE AC SMART CHARGER

IMPORTANT TRANSFORMER SAFETY INFORMATION

ATTENTION!

To ensure the safety of people and possessions, it is important that you read all of the following instructions.

Incorrect installation or incorrect use of the product could cause serious harm.

The Isolation Transformer that supplies the **24V Low-voltage AC Charger**;

- **MUST** meet all Country Regulatory Standards
 - **MUST** meet all Local Regulatory Requirements
 - **MUST** be a Safety Isolating Transformer
 - **MUST** be Double-wound
 - **MUST** be fitted with a **Thermal Fuse** on the Primary / Input of the Transformer
 - **MUST** be installed according to Country and Local Regulatory Standards
-
- All installation, repair, and service work to this product must be carried out by a suitably qualified person
 - Do not install the equipment in an explosive atmosphere; the presence of flammable gases or fumes is a serious danger to safety
 - Before attempting any work on the system, turn off electrical power to the Isolating Transformer and disconnect the batteries
 - The Mains power supply of the Isolating Transformer must be fitted with an all-pole switch with contact opening distance of 3mm or greater; use of a hydraulic breaker with all-pole circuit break is recommended
 - Make sure that an earth leakage circuit breaker with a threshold of 30mA is fitted upstream of the system
 - Make sure that the earthing system is correctly constructed and that all metal parts of the system are suitably earthed

Isolating Transformer Requirements

Output Voltage	24V AC MIN (Loaded) 28V AC MAX (Unloaded/Open circuit)	
Output Current	2A MIN (@ 24 V AC = 50VA)	
Transformer Fuse Protection	Type	Rating
	Thermally Fused	According to VA rating

TABLE 1

1. Introduction

The **24V Low Voltage AC SMART Charger** was developed to complement 24V gate operators, and is ideal for residential sites.

The **24V Low Voltage AC SMART Charger** makes use of a Low Voltage AC input (24–28V AC) supplied via an isolation transformer to supply and charge the batteries of 24V gate operators.

2. Technical Specifications

Input Voltage	Low-voltage 24-28V AC 50/60Hz
Output Voltage	27.4V DC (float) +/- 1%
Output Current	1.7A +/- 5%

4. Installation and Wiring

For Installation and wiring, please refer to the Installation Manual of the 24V Operator this is being installed into.

Scan the QR Code in Figure 2 to access our digital SMART Portal for quick reference to the relative Installation Manuals.
